Assumption-based working estimate — supplier data needed

Multivitamin & mineral liquid

Category: To be confirmed · Dietary status: To be confirmed

Nutritional Information (Approximate Values)

Serving size 1 mL

Nutrient	Per serving (1 mL)	% RDA Men*	% RDA Women**	% RDA 10–12 years***
Main nutrients				
Energy	≈0.8 kcal	—	—	—
Intact protein	≈0 g	—	—	—
Carbohydrate	≈0.2 g	—	—	—
Total sugars	≈0.2 g	—	—	—
Added sugars	≈0.2 g	≈0.4%	≈0.4%	—
Dietary fibre	≈0 g	≈0%	≈0%	≈0%
Total fat	≈0 g	≈0%	≈0%	—
Saturated fat	≈0 g	≈0%	≈0%	—
Trans fat	≈0 g	≈0%	≈0%	—
Sodium	≈0.64 mg	≈0.03%	≈0.03%	≈0.03%
Vitamins				
Vitamin C	4 mg	5%	6.15%	7.27%
Vitamin B3 (niacin)	4 mg	22.22%	28.57%	26.66%
Vitamin B2 (riboflavin)	0.4 mg	16%	16.66%	19.04%
Vitamin B6	0.2 mg	8.33%	10.52%	10%
Vitamin B1 (thiamin)	0.3 mg	16.66%	17.64%	20%
Vitamin B12	0.4 µg	18.18%	18.18%	18.18%
Vitamin B5 (pantothenic acid equivalent)	≈1.6 mg	≈32.04 %	≈32.04 %	≈32.04 %
Minerals				
Zinc (as Zinc sulphate)	3 mg	17.64%	22.72%	35.29%
Iodine (as Potassium iodide)	45 µg	32.14%	32.14%	45%

* ICMR-NIN 2020: men (moderate work). ** Women (moderate work). *** One child reference: boys aged 10–12; girls' requirements differ. Includes the 2021 corrigendum, as published by FSSAI.

Percentages are per serving, truncated to two decimals. "Known <0.01%" describes only the calculated contribution. "—" means the amount or intake reference is unavailable. Adult energy, added sugar and fat use fixed FSSAI pack-label references. Fibre, biotin and pantothenic acid use adequate intake (AI); vitamin E shows the published 7.5–10 mg range. Molybdenum uses Codex. Folic acid is converted to dietary folate equivalents (×1.7) for its percentage.

Theoretical formulation calculation — not a laboratory assay or regulatory approval.

Ingredients: Sugar, Nicotinamide, Ascorbic acid, Preservative (Sodium benzoate; INS 211), Zinc sulphate, D-panthenol, Preservative (Benzoic acid; INS 210), Preservative (Sodium methylparaben; INS 219), Preservative (Propylparaben; INS 216), Riboflavin sodium phosphate (INS 101(ii)), Thiamine hydrochloride, Pyridoxine hydrochloride, Preservative (Bronopol; INS unverified), Potassium iodide, Cyanocobalamin, Water (q.s. to finished 1 mL)

INS assigned: 5 ingredients (codes in ingredient statement). No INS assigned for nutritional use: Nicotinamide, Ascorbic acid, Zinc sulphate, D-panthenol, Thiamine hydrochloride, Pyridoxine hydrochloride, Potassium iodide, Cyanocobalamin. INS not verified: Bronopol. INS not applicable: Sugar, Water.

Intended users: *To be confirmed*

Recommended usage: *To be confirmed — serving size is not a daily-use instruction.*

Duration of use: *To be confirmed*

Directions: *To be confirmed*

Storage: *To be confirmed*

Cautions: *To be confirmed*

Allergen information: *To be confirmed*

Net quantity	*To be confirmed*
Batch no.	*To be confirmed*
Manufactured	*To be confirmed*
Expiry / best-before	*To be confirmed*
MRP (inclusive of taxes)	*To be confirmed*
Licence no.	*To be confirmed*

Barcode: Barcode / GTIN to be supplied.

Estimated macros assume water and pure ingredients without nutritive carriers; ≈0 is assumed, not measured. Active forms and assays require confirmation. Supplier identity / permitted use to confirm: Sodium methylparaben, Propylparaben, Bronopol. Full details are in the ingredient review. Vitamin C, B3, B2, B1, B6 and B12 are assumed declared active amounts; zinc and iodine are elemental amounts, not salt weights. B5 is the theoretical equivalent of pure D-panthenol. Sugar is assumed pure sucrose at 4 kcal/g; sodium includes the B2 sodium counterion. Confirm assays and actual ingredient weights; ingredient order is provisional. Incomplete product declarations: 16. Fields marked "To be confirmed" must be completed before final artwork.

INS codes identify additives; they do not establish permission for this product or complete nutrient data. Manufacturer / marketer details must be added separately.
