Assumption-based working estimate — supplier data needed

B vitamins & lysine

Category: To be confirmed · Dietary status: To be confirmed

Nutritional Information (Approximate Values)

Serving size 15 mL

Nutrient	Per serving (15 mL)	% RDA Men*	% RDA Women**	% RDA 10–12 years***
Main nutrients				
Energy	≈0.1 kcal	—	—	—
Intact protein	≈0 g	—	—	—
Carbohydrate	≈0 g	—	—	—
Total sugars	≈0 g	—	—	—
Added sugars	≈0 g	≈0%	≈0%	—
Dietary fibre	≈0 g	≈0%	≈0%	≈0%
Total fat	≈0 g	≈0%	≈0%	—
Saturated fat	≈0 g	≈0%	≈0%	—
Trans fat	≈0 g	≈0%	≈0%	—
Sodium (as Sodium methylparaben, assumed from Nepazene; INS 219; as Sodium benzoate; INS 211)	≈9.16 mg	≈0.45%	≈0.45%	≈0.45%
Vitamins				
Vitamin B3 (niacin)	13 mg	72.22%	92.85%	86.66%
Vitamin B2 (riboflavin)	1 mg	40%	41.66%	47.61%
Vitamin B6	1 mg	41.66%	52.63%	50%
Vitamin B1 (thiamin)	1 mg	55.55%	58.82%	66.66%
Vitamin B12	1 µg	45.45%	45.45%	45.45%
Vitamin B5 (pantothenic acid equivalent)	≈2.67 mg	≈53.4%	≈53.4%	≈53.4%
Minerals				
Chloride from lysine HCl (as Lysine hydrochloride; INS 642)	≈4.85 mg	—	—	—
Amino acids				
Lysine	≈20.01 mg	—	—	—

* ICMR-NIN 2020: men (moderate work). ** Women (moderate work). *** One child reference: boys aged 10–12; girls' requirements differ. Includes the 2021 corrigendum, as published by FSSAI.

Percentages are per serving, truncated to two decimals. "Known <0.01%" describes only the calculated contribution. "—" means the amount or intake reference is unavailable. Adult energy, added sugar and fat use fixed FSSAI pack-label references. Fibre, biotin and pantothenic acid use adequate intake (AI); vitamin E shows the published 7.5–10 mg range. Molybdenum uses Codex. Folic acid is converted to dietary folate equivalents (×1.7) for its percentage.

Theoretical formulation calculation — not a laboratory assay or regulatory approval.

Ingredients: Preservative (Sodium benzoate; INS 211), Lysine hydrochloride (INS 642), Preservative (Benzoic acid; INS 210), Preservative (Sodium methylparaben; INS 219), Niacinamide, Mixed fruit essence, Sweetener (Saccharin; INS 954), Preservative (Propylparaben; INS 216), Sweetener (Aspartame; INS 951), D-panthenol, Preservative (Bronopol; INS unverified), Vitamin B1, Vitamin B2, Vitamin B6, Vitamin B12, Water (q.s. to finished 15 mL)

INS assigned: 7 ingredients (codes in ingredient statement). No INS assigned for nutritional use: Niacinamide, D-panthenol, Vitamin B1, Vitamin B6, Vitamin B12. Exact form needed: Vitamin B2. No single INS for flavour mixture: Mixed fruit essence. INS not verified: Bronopol. INS not applicable: Water.

Intended users: *To be confirmed*

Recommended usage: *To be confirmed — serving size is not a daily-use instruction.*

Duration of use: *To be confirmed*

Directions: *To be confirmed*

Storage: *To be confirmed*

Cautions: *To be confirmed*

Sweetener declaration: *Contains aspartame (INS 951), a source of phenylalanine. Confirm the required category-specific declaration before finalizing.*

Allergen information: *To be confirmed*

Net quantity	*To be confirmed*
Batch no.	*To be confirmed*
Manufactured	*To be confirmed*
Expiry / best-before	*To be confirmed*
MRP (inclusive of taxes)	*To be confirmed*
Licence no.	*To be confirmed*

Barcode: Barcode / GTIN to be supplied.

Estimated macros assume water and pure ingredients without nutritive carriers; ≈0 is assumed, not measured. Active forms and assays require confirmation. Supplier identity / permitted use to confirm: Sodium methylparaben, Saccharin, Propylparaben, Aspartame, Bronopol, Vitamin B2. Full details are in the ingredient review. Incomplete product declarations: 17. Fields marked "To be confirmed" must be completed before final artwork.

INS codes identify additives; they do not establish permission for this product or complete nutrient data. Manufacturer / marketer details must be added separately.
