Assumption-based working estimate — supplier data needed

Papain, lysine & B vitamins

Papain, lysine and B vitamins · 15 mL dose

Category: To be confirmed · Dietary status: To be confirmed

Nutritional Information (Approximate Values)

Serving size 15 mL

Nutrient	Per serving (15 mL)	% RDA Men*	% RDA Women**	% RDA 10–12 years***
Main nutrients				
Energy	≈0.3 kcal	—	—	—
Intact protein	≈0.06 g	—	—	—
Carbohydrate	≈0 g	—	—	—
Total sugars	≈0 g	—	—	—
Added sugars	≈0 g	≈0%	≈0%	—
Dietary fibre	≈0 g	≈0%	≈0%	≈0%
Total fat	≈0 g	≈0%	≈0%	—
Saturated fat	≈0 g	≈0%	≈0%	—
Trans fat	≈0 g	≈0%	≈0%	—

Vitamins				
Vitamin B3 (niacin)	3 mg	16.66%	21.42%	20%
Vitamin B6	0.75 mg	31.25%	39.47%	37.5%
Vitamin B1 (thiamin)	1 mg	55.55%	58.82%	66.66%
Amino acids				
Lysine	15 mg	—	—	—
Enzymes (ingredient weight)				
Papain	60 mg	—	—	—

* ICMR-NIN 2020: men (moderate work). ** Women (moderate work). *** One child reference: boys aged 10–12; girls' requirements differ. Includes the 2021 corrigendum, as published by FSSAI.

Percentages are per serving, truncated to two decimals. "Known <0.01%" describes only the calculated contribution. "—" means the amount or intake reference is unavailable. Adult energy, added sugar and fat use fixed FSSAI pack-label references. Fibre, biotin and pantothenic acid use adequate intake (AI); vitamin E shows the published 7.5–10 mg range. Molybdenum uses Codex. Folic acid is converted to dietary folate equivalents (×1.7) for its percentage.

Theoretical formulation calculation — not a laboratory assay or regulatory approval.

Ingredients: Papain (INS 1101(ii)), Lysine, Niacinamide, Vitamin B1, Vitamin B6, Water (q.s. to finished 15 mL)

INS assigned: 1 ingredient (codes in ingredient statement). No INS assigned for nutritional use: Lysine, Niacinamide, Vitamin B1, Vitamin B6. INS not applicable: Water.

Intended users: *To be confirmed*

Recommended usage: *To be confirmed — serving size is not a daily-use instruction.*

Duration of use: *To be confirmed*

Barcode: Barcode / GTIN to be supplied.

Estimated macros assume water and pure ingredients without nutritive carriers; ≈0 is assumed, not measured. Active forms and assays require confirmation. Working estimate assumes water to 15 mL, pure papain as 60 mg enzyme protein and lysine as 15 mg free active L-lysine. No sugar, oil or nutritive carriers. Papain activity, grade, assay, formulation stability and finished-product composition need supplier confirmation. Incomplete product declarations: 16. Fields marked "To be confirmed" must be completed before final artwork.

INS codes identify additives; they do not establish permission for this product or complete nutrient data. Manufacturer / marketer details must be added separately.
